WIRELESS CONNECTIVITY

WORDMARK

REGISTERED TRADEMARK

OPEN "O"

TAGLINE

The new OpenWrt logo is using the **Galano Classic SemiBold** font style conveying simplicity and confidence of the project's operating system powered by the Linux kernel. Placed at its left is the OpenWrt symbol which displays a noncompleted circle/letter "O" and a wireless connectivity icon. The noncompleted circle represents not only the project's name but also its aim. Together with the wireless connectivity icon, the symbol emphasizes the project's commitment to its userbase which is to provide freedom to fully customize applications.

Consistent use of the OpenWrt logo is needed to construct a uniform brand identity. The master logo is supplied as artwork and should never be transformed or regenerated in any way.

Logo Spacing

When using the logo with other graphic elements, the logo should have the needed space to breathe. The clear space around the logo should be at least the quarter of the given "x" measurement. To ensure that the visual details of the logo are maintained, it is advised not to make it smaller than **70 px.** wide.

Logo Usage

(In Images)

To maintain branding, the OpenWrt's logo colours must be used consistently according to the specific colour relationship with the logo and the background. In cases, where the logo is used in backgrounds of different colour, it is advised to utilize either the black or white logo version.

For images, applying 10-30% black tint to the entire image is suggested to preserve the visual appearance of the white logo.

Never use the OpenWrt's logo in different colours just to suite the person's interest of making it fancier. Remember, the colours of the logo are specifically chosen to represent the identity of the company, so it must be preserved.

Note: the black logo can only be used on a black and white scheme. Where white is dominant on the background.
