

# OpenWrt + LEDE wiki merge

# External links to OpenWrt / LEDE wikis

What about all the links to the old OpenWrt wiki / LEDE wiki in the forums, on blogs, private websites, ...? When merging the two wikis, we will break quite some stuff.

- How will the old OpenWrt wiki (archive) be reachable?
- How can we keep external links to the OpenWrt wiki maximum functional?
  - old OpenWrt wiki to be reachable under **oldwiki.openwrt.org** (separate wiki)
    - Links to old wiki are still functional when prefixed with „old“ -> easy, scriptable solution
    - Oldwiki not part of new wiki -> no interference of dataentries in new wiki
  - new OpenWrt wiki to be reachable under **wiki.openwrt.org**
    - Namespace structure to be c/o from OpenWrt wiki (minimum link breakage)

# Overview

# Merge process

1. Freeze OpenWrt wiki (make read-only)
2. Create separate wiki under **oldwiki.openwrt.org** (on LEDE servers)
3. Freeze LEDE wiki (make read-only)
4. Keep LEDE wiki available under [lede-project.org](http://lede-project.org)
5. Copy both wikis to temp directory + add tags to all of the pages:
  - {{tag>source:OWrt unchecked}}
  - {{tag>source:LEDE unchecked}}
6. Create New OpenWrt wiki under [wiki.openwrt.org](http://wiki.openwrt.org)
  - Based on old OpenWrt wiki styles
  - Based on old OpenWrt wiki namespace structure, in order to keep maximum link compatibility to old OpenWrt wiki
7. Import data of OpenWrt + LEDE wiki via script
  - select certain pages from each wiki and copy them to the New OpenWrt wiki
  - Why script? -> easily repeatable, traceable, changeable
8. When finished, create wiki pageindex (admin)
9. In the New OpenWrt wiki, review all pages which are tagged *unchecked*, and after review and merging pages, change the tagging to {{tag>checked}}
